

# Act! Premium v18

## System Requirements

All minimum system requirements are based on a single-user environment (one computer accessing a local database). In a shared environment, Act! Pro is designed to work with up to 10 users and Act! Premium is designed to work with more than 10 users. Recommended server system requirements are for environments of more than one user. Customer registration and activation are required and you must purchase one license of Act! per user. Your system must meet the minimum requirements to be eligible for technical support.

## SQL Server Edition Recommendations

SQL Express limits CPU cores/sockets, memory used by SQL and the size of your data file to 10GB. For this reason, we recommend SQL Standard for any deployment over 20 users or 2GB in size. Individual performance may vary based on actual database size, hardware variations, and product usage.

\* Only for upgrades, not clean install

1. Office 365 and Click to Run versions of Microsoft® Office are not supported.
2. Compatibility Mode is no longer required or recommended.
3. Windows XP Professional limits the number of concurrent network connections to 10 (Home Edition limits concurrent connections to 5).
4. Windows Vista limits the number of concurrent network connections to 10 (Home Basic and Home Premium Editions limit concurrent connections to 5).
5. "Core Server Installation" of Windows Server 2008 is not supported.
